Leetcode Profile:- sanidhya_sp

Professional Summary

Aspiring **Data Scientist** with a strong foundation in **Python, Statistics, SQL, Generative AI** and **Machine Learning**. Complemented by hands-on experience working with AI tools at Amazon to streamline and support data-driven operations. Passionate about extracting insights from structured data, building predictive models, and applying AI solutions to solve real-world problems. Quick learner with excellent problem-solving skills, and a growing portfolio of **Data Science** and **ML** projects using tools like **Pandas, Numpy, Scikit-learn**, and **Matplotlib**

Skills

Programming Languages:

Python, SQL

Data Science & ML Libraries:

Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Machine Learning & AI:

Supervised & Unsupervised Learning, Generative AI, Model Evaluation

Database Management:

SQL (Structured Query Language), Data Cleaning & Manipulation

Tools & Platforms:

Jupyter Notebook, Git, GitHub, Google Collab

Soft Skills:

Problem Solving, Logical Thinking, Team Collaboration

Bonus – Web Technologies (Prior Experience):

HTML, CSS, JavaScript

Work Experience

GO AI Associate | Amazon | [May/2024 – August/2024] (4 months)

- Managed operational workflows using AI tools to enhance efficiency.
- Collaborated with teams to streamline AI-driven tasks and optimise output quality.
- Gained hands-on experience in AI-based automation processes.

Teaching Experience (8 years)

- Taught Physics, Chemistry, and Mathematics to students helping them build strong conceptual understanding and improve their academic performance.

Education

B.Tech in [Civil Engineering] | Ajay Kumar Garg Engineering College (2017–2021)

Projects

Portfolio Website – Personal Web Developer Portfolio

- Designed and developed a personal portfolio website to showcase projects and skills.
- Built using HTML, CSS, and JavaScript for a responsive and interactive design.
- Integrated GitHub and LinkedIn links for easy professional access.
- Technologies used :- HTML 5, CSS, MEDIA QUERY, BOOT STRAP, GITHUB, JAVA SCRIPT
- Deployed the website using GitHub Pages: [Portfolio Link-<https://sanidhya010.github.io/personal-web/>]

DogMatch – A Tinder-Like App for Dogs

- Developed a web-based matchmaking platform for dogs using HTML, CSS, JavaScript, and Python.
- Implemented swipe-based UI for dog owners to connect their pets with compatible playmates.
- Integrated Firebase database for user authentication and real-time matchmaking.
- Optimised performance and ensured mobile responsiveness for a seamless user experience.
- Hosted the project on [GitHub/Live Demo Link-<https://sanidhya010.github.io/tommy-by-saniprat/>]

Creative Design Agency Website

- Designed and developed a modern, visually appealing website for a creative design

agency.

- Implemented smooth animations and an interactive UI using HTML, CSS, and JavaScript.
- Created responsive layouts to ensure a seamless experience across devices.
- Optimised the website for fast loading speeds and SEO best practices.
- Hosted the project on GitHub: [Project Link-<https://sanidhya010.github.io/Website2/>]

MOVE IT – Transportation & Logistics Website

- Built a website for 'MOVE IT,' a company specializing in transporting luggage, furniture, and more.
- Developed an intuitive booking system using JavaScript for easy service selection.
- Integrated a location-based feature to help customers find the nearest moving services.
- Ensured mobile responsiveness and user-friendly navigation.
- Deployed the website for live use: [Project Link-<https://sanidhya010.github.io/moveitbysaniprat/>]

Forest Fire Analysis using GIS Technology

- Conducted a detailed analysis of forest fire patterns using Geographic Information Systems (GIS).
- Collected and processed spatial data to identify fire-prone regions and risk factors.
- Used GIS mapping techniques to visualize fire spread and assess environmental impact.
- Provided data-driven insights for disaster management and prevention strategies.
- Presented findings as part of a civil engineering research project.

Certifications

Generative AI – LinkedIn Learning

- Completed 'What Is Generative AI?' on LinkedIn Learning.
- Covered topics: Artificial Intelligence for Business, AI Fundamentals, and Generative AI.
- Completion Date: May 6, 2024

Generative AI for Executives – AWS Training & Certification

- Successfully completed 'Generative AI for Executives' by AWS Training & Certification.
- Gained insights into AI-driven business strategies and applications.
- Completion Date: July 1, 2024

The Complete SQL Bootcamp – Udemy

- Successfully completed 'The Complete SQL Bootcamp: Go from Zero to Hero' on Udemy.

- Covered SQL fundamentals, database management, and query optimization.
- Completion Date: August 15, 2024

AWS Skill Builder – Fundamentals of Machine Learning and AI

- Successfully completed the 'Fundamentals of Machine Learning and Artificial Intelligence' course on AWS Skill Builder.
- Gained hands-on experience with machine learning concepts, AI applications, and AWS AI services.
- Completion Date: July 18, 2024

Additional Information

- Languages: English (Fluent), Hindi (Fluent)
- Interests: Web Development, AI Integration in Web Apps, Reading about history
